

Innovation Forecast 2030: Assume that we have achieved Sustainable Development Goal 5 - Gender Equality

Imagine it is 2030.
We have achieved the gender equality targets set out in Sustainable Development Goal #5
<https://sustainabledevelopment.un.org/sdg5>

Targets Achieved

- No violence or exploitation
- Equal pay, equal opportunities in work, leadership, government
- Equal access to land, finances, property ownership
- Equal access to education
- No FGM, no forced marriage, no child marriage
- Control over own reproductive decisions, health, treatment

How?

How did we get there?
How did we achieve the targets in 12 years?

Ideas

Come up with ideas to meet the challenge.
State the obvious, dream big, think the impossible!
Ideas cannot create harm to people or planet, otherwise all ideas count.

Notice

Notice your thinking
...what hopes do you have if we achieve the targets?
...what concerns do you have if we achieve the targets?

Impact 2030

- What does the world look like having achieved the targets?
- What does it look like for you personally?
- What impact will there be on people - social?
- What impact will there be on planet - environment?
- What impact will there be on profit - economics?

What Next?

Raise awareness by asking your community to come up with ideas too.
